University of Bari (Italy)

SHORT BIO

Elvira Brattico (PhD University of Helsinki, Finland) is Professor of Neuroscience, Music, and Aesthetics at Aarhus University in Denmark and of Neuropsychology and Cognitive Neuroscience at the University of Bari in Italy.

In 2015, she co-founded the Center for Music in the Brain (MIB), a center of excellence in Denmark dedicated to music neuroscience, and previously in 2008 she co-founded the Finnish Center of Excellence in Interdisciplinary Music Research in Finland. Her scientific output includes over 200 articles in peer-reviewed journals, 6 books, and numerous chapters for Oxford University Press, Springer and Routledge.

She directs the Aarhus Summer School in Music Neuroscience, a biennial key event in the field and periodically act as panelist for the European Commission. She is an internationally recognized expert in music neuroscience, actively conducting neurologically-based clinical trials for the rehabilitation of several neurological conditions and neurodevelopmental disorders.
